

PROJECTS

Wayfair.com - Explore Our Shops (Homepage) (React, Sass, PHP) - [Live](#)

- Developed and integrated a new feature on the homepage to drive traffic to brand pages
- Utilized GraphQL to fetch nested complex data based on user interactions with feature
- Conditionally rendered the feature on homepage based on A/B test groups
- Developed mobile first responsive layouts for all screen sizes and device types

ApartmentQuirks.com (Rails, React, Sass, Postgres) - [Live](#) | [Github](#)

- Its RESTful architecture utilizes Ajax and JSON for lightning fast rendering
- Customized user authentication system using BCrypt gem for password hashing
- Stores images in the cloud and uses efficient data fetching for graceful scale
- Utilized componentDidCatch to handle component level error messaging

Pac-Man (JavaScript) - [Live](#) | [Github](#)

- Built using vanilla JavaScript following the principals of Object Oriented Programming
- Tracks character movement on a matrix for dynamic animation rendering
- Transpiled to ES5 bundle using Babel and Webpack for maximum browser support
