

## PROJECTS

### Wayfair.com - Explore Our Shops Feature (React, Sass, PHP) - Live

- Created dynamic navigation that can handle "n" nav items for any screen width
- Lazy loading images below the fold and utilizing srcset for optimized performance
- Worked with designers to ensure the feasibility of new features being developed
- Executed A/B testing for new features to allow analysts to track new feature success

### ApartmentQuirks.com (Rails, React, Sass, Postgres) - Live

- Its RESTful architecture utilizes Ajax and JSON for lightning fast rendering
- Customized user authentication system using BCrypt gem for password hashing
- Stores images in the cloud and uses efficient data fetching for optimized app scaling
- Utilizing componentDidCatch to gracefully handle any errors that could occur

### Wayfair.com Extranet (React, Sass, GraphQL, PHP)

- Added component editors so suppliers can upload content and media to the site
- Utilized Redux to manage data as content is being added through the extranet tool

## SKILLS

JavaScript, React, Ruby, Rails, PHP, Redux, Sass, Git, HTML, CSS, GraphQL, jQuery
