EDUCATION

Team Treehouse '16-'17

Full-Stack Web Development

Ithaca College '03-'07

B.S. Communication Management and Design

PROJECTS

Mercury Row, a Wayfair Brand (React, Sass) - *Live*

- Responsive nav that moves items to more dropdown based on screen width
- Lazy loading content below the fold and utilizing srcset for optimized performance on all types of devices
- Developed feature designs with design team to increase team cohesion
- Accessible text color generator for variable background color features

Apartment Quirks (React, Redux, Rails) - *Live*

- Its RESTful architecture utilizes Ajax and JSON for lightning fast rendering
- Created a customized user authentication system using the BCrypt gem
- Stores images in the cloud and uses efficient data fetching for graceful scale

Pac-Man (JavaScript, Node.js) - *Live*

- Built using vanilla JavaScript following the principals of OOP
- Transpiled to ES5 using babel and webpack for maximum browser support
- Tracks characters movements on a matrix for dynamic animation rendering
